

Interactive Math Websites And Apps For Kids *Grades 3-6*

Websites:

- <http://www.fun4thebrain.com>
 - This site includes a wide range of games for practicing math facts (addition, subtraction, multiplication and division).
- www.uen.org/3-6interactives/math.shtml
 - This site includes a wide variety of games and activities related to tangram puzzles, patterns, sorting, adding, subtracting, geometry and place value.
- www.sheppardsoftware.com
 - When entering the site, click on “Math” at the top. Then, select an area of focus in order to see a specific set of games and activities.
- <http://www.coolmath4kids.com>
 - This site includes great games for a variety of math topics. It is good for the development of logical reasoning skills and strategic thinking, as well as practicing math facts.
- www.hoodamath.com
 - This site includes a variety of games and activities related to the four operations – addition, subtraction, multiplication and division.
- <http://xtramath.org>
 - This site provides personalized fact fluency practice. It can be accessed on the computer as well as on the iPad. Students already have accounts for the XtraMath site from this past school year.

Apps:

- Mathignition (Focus: fact fluency)
- IXL Math (Focus: Grade-level specific questions related to multiple topics; You can enter as a guest for free and answer up to 20 questions per day)

****Disclaimer: Some websites and apps may have advertisements. Please be sure to monitor your child when completing activities.**
